Proper Handling of USB, HDMI, D Ports & Power Plugs

Professional Training Guide to Safe Connection Practices

■ USB Ports		
Step 1 - DO ■	Align properly before inserting. (Image Placeholder)	Do not wiggle or twist the connector. (Image Placeholder) ■
Step 2 - DO ■	Insert gently—never force the connection. (Image Placeholder)	Do not pull by the cable. (Image Placeholder) ■
Step 3 - DO ■	Hold by the plug, not the cable when connecting or disconnecting. (Image Placeholder)	Avoid connecting with dust or debris present. (Image Placeholder) ■

■ HDMI Ports		
Step 1 - DO ■	Check orientation before insertion. (Image Placeholder)	Do not yank the HDMI cable. (Image Placeholder) ■
Step 2 - DO ■	Push in firmly until fully seated. (Image Placeholder)	Avoid bending the cable sharply near the connector. (Image Placeholder) ■
Step 3 - DO ■	Use cable clips to reduce bending strain. (Image Placeholder)	Never plug in while wet or dusty. (Image Placeholder) ■

■ D Ports (DisplayPort / DVI)		
Step 1 - DO ■	Ensure latch is released before unplugging. (Image Placeholder)	Do not twist to remove connector. (Image Placeholder) ■
Step 2 - DO ■	Keep connectors clean and covered. (Image Placeholder)	Avoid excessive cable tension. (Image Placeholder) ■
Step 3 - DO ■	Support both plug and socket during insertion. (Image Placeholder)	Do not use damaged connectors. (Image Placeholder) ■

■ Power Plugs		
Step 1 - DO ■	Switch off before plugging or unplugging. (Image Placeholder)	Do not overload sockets. (Image Placeholder) ■
Step 2 - DO ■	Hold the plug firmly, not the cord. (Image Placeholder)	Avoid pulling cords at an angle. (Image Placeholder) ■
Step 3 - DO ■	Check for a snug fit—no loose connection. (Image Placeholder)	Never touch with wet hands. (Image Placeholder) ■

Corporate Style: Blue-grey theme, numbered steps, icons for Do’s and Don’ts, ready for realistic image insertion.
